POWERING ALBERTANS

- Electricity demand in Alberta is growing as communities expand, industries develop, and more parts of everyday life rely on power.
- To keep up, Alberta needs new sources of electricity that people can count on. Power that is clean, affordable, and reliable, and supports the province over the long term.
- The Alberta Electric System Operator has identified Northwest Alberta as an area where more power generation is needed to help meet that demand.

WHO WE ARE

- Korkia Ltd. is a privately owned Finnish renewable energy investor and developer. For over 20 years, we have been building large-scale power projects across Europe and the Americas, with a focus on supporting the transition to more sustainable energy.
- Northern Renewables Ltd. is Korkia's Alberta-based company. In fall 2025, Korkia took full control of the business and renamed it from Universal Kraft Canada Renewables Ltd.
- This change reflects a renewed focus on doing things the right way here in Alberta, with a stronger local presence and a commitment to working respectfully with communities, landowners, and municipalities.

LOCAL GENERATION FOR A GROWING REGION

- Greenview sits in a part of the province where more power is needed. Local generation helps ensure that growth, investment, and new opportunities can continue in the region.
- Our goal is to deliver this in a way that brings real, long-term value to the community. We aim to produce clean, affordable electricity built for Alberta conditions, support a stable power supply as demand grows, and create local jobs and business opportunities in the Municipal District of Greenview.

WHY WE ARE HERE

- We are here because this region has an opportunity to play an important role in Alberta's growing power system, and we believe that should benefit the people who live and work here.
- Our focus is on working with landowners, residents, and the Municipal District of Greenview to understand what matters most and how development can support local priorities.
